Summary

Data Analyst with hands-on project experience collecting, cleaning, and analyzing sales, HR, and business data to identify trends and support decision-making. Skilled in building recurring reports and interactive dashboards (Power BI, Excel, DAX, Power Query/Power Pivot) that track KPIs and surface actionable insights for stakeholders. Proficient in SQL for relational data extraction and Python for data cleaning, modeling, and statistical analysis. Comfortable working across regional and project-specific reporting, with a strong foundation in data modeling and process improvement for data recording and analysis systems.

Core Skills

BI & Reporting

Microsoft Power BI, Power Query, Power Pivot, DAX, Excel (Pivot Tables, advanced formulas), regional & project-specific reporting

Data Analysis

Sales trend analysis, KPI tracking, EDA, data cleaning & wrangling, statistical analysis, data modeling, ad hoc & business reporting

Programming & Query

Python (pandas-based analysis), SQL (JOIN, GROUP BY, HAVING, subqueries, aggregate functions)

Databases

MySQL, MongoDB

Tools

VS Code, Git, GitHub

RELEVANT PROJECT EXPERIENCE

SQL & Python Data Analysis

01/2026 – 04/2026

- Wrote optimized SQL (JOIN, GROUP BY, HAVING, ORDER BY, subqueries, aggregate functions) for multi-table business and sales reporting.
- Used Python to clean, query, and statistically analyze relational data, producing analytical summaries of sales and customer behavior for decision-making.
- Tools: Python, SQL, MySQL

Sales Performance Dashboard, *Power BI*

04/2025 – 05/2025

- Collected and analyzed multi-product-line sales data to identify revenue, profit margin, and growth trends, translating findings into a decision-support dashboard for management.
- Built and maintained the underlying data recording and transformation system using Power Query, and developed reusable DAX measures for consistent, repeatable metric calculation.
- Delivered dynamic visualizations of revenue, profit margin, customer growth, and sales trends used to inform business decisions.
- Tools: Power BI, Excel, DAX, Power Query

HR Analytics Dashboard, *Power BI*

08/2025

- Analyzed workforce and attrition data to identify retention risk trends, applying the same trend-analysis approach used for sales/CRM-style datasets.
- Built an interactive dashboard tracking retention, tenure, and performance KPIs, and prepared summary reports for stakeholder decision-making.
- Tools: Power BI, Excel, DAX

Experience

Independent & Academic Projects, *Data Analyst*

08/2025 – 04/2026

- Performed end-to-end data analysis on real-world datasets: collection, cleaning, exploratory analysis, and reporting to support data-driven decisions.
- Developed and refined data models and reporting processes in Power BI/Excel, improving accuracy and reusability of recurring KPI and trend reports.
- Applied statistical analysis in Python to identify trends and support business and workforce decision-making.

Education

B.Tech, Computer Science and Engineering, *Uttarakhand Technical University*

2023 – 2027

Senior Secondary (Class XII), *Riverain Public School*

2023 – 2023

76%

Secondary (Class X), *Sami Academy High School*

2021 – 2021

71%
